Studies in Tectonic Culture is nothing less than a rethinking of the entire modern architectural tradition. The notion of tectonics as employed by Frampton—the focus on architecture as a constructional craft—constitutes a direct challenge to current mainstream thinking on the artistic limits of postmodernism, and suggests a convincing alternative.

Studies in Tectonic Culture: The Poetics of Construction ...

Of the recent discussions on the relation of architectural theory to building practice, Kenneth Frampton's Studies in Tectonic Culture (1995) stands out; but Frampton's book is limited by his anti-postmodernist framework, his mode of argument that largely attributes the value of architectural works to a theoretical dimension, his treatment of construction as a constant and passive given, and his disregard for the entirety of British architecture.
