appreciate integrated marketing communications as a business strategy. The author describes the processes and considerations needed to appeal to consumers, identifying how geographic segmentation, timing, competitive environments, and cost contribute to planning. He considers the integration of digital technology, such as social media platforms and mobile apps, and how these can be used for advertising, sales promotion, and public relations. The book's concise, easy to read explanation of marketing components and their interconnected relationships is solidified by a series of visual summaries as well as examples and useful demonstrations. Students are given the opportunity to prepare their own integrated marketing communication plan based on consumer, product, and market research along with original creative materials and media spreadsheets. Students of marketing communication, advertising and promotion, and digital marketing will love this book's abbreviated, but thorough format. An interactive companion website rounds out a stellar set of features that encourage quick understanding, participation, and utilization of IMC concepts.

Rosemary MacKinnon, the funny, sexy fashion editor of Panache, jets off to Europe and New York to cover the ready-to-wear collections. Suddenly, the man of her dreams, a publishing magnate, falls under her spell. Why? Apart

from shop talk mingled with their bedroom antics, he hardly speaks to her. Half-Vietnamese, Rosemary suspects he has a thing for exotic-looking women. Finally, regular-guy Max Appelbaum shows Rosemary how much appearances really count. Just in time, too, because the hunky Magnate's motives turn out to be even shadier than Rosemary had imagined.

This monograph provides a framework and guidelines for the assessment of institutional frameworks for integrated water resources management (IWRM). The framework and guidelines were developed to enable expert teams of the Inter-American Development Bank to incorporate capacity-building considerations into water-related projects. The framework and guidelines were tested in four countries with different physical, social and economic environments in Latin America and the Caribbean. Using this framework, it is possible to identify shortcomings in existing water management

arrangements and to formulate interventions at and between the constitutional, organizational, and operational levels. To guide the formulation of interventions, an ideal IWRM situation is formulated. Due to the temporal and spatial specificity, a desired IWRM situation is formulated in a process which consists of ten operational steps. This process is based on an extensive consultation and participation of all relevant stakeholders. The fields of interventions concern awareness creation, policy development, legal and financial arrangements, human resources development and management information and decision support systems.
