Sustainable development is an approach to economic planning that attempts to foster economic growth while preserving the quality of the environment for future generations. Despite its enormous popularity in the last two decades of the 20th century, the concept of sustainable development proved difficult to apply in many cases, primarily because the results of long-term sustainability analyses depend on the particular resources focused upon.

Environmental law - Sustainable development | Britannica

Sustainable development law and policy has only begun to be addressed by existing institutions, and not in an adequately integrated way. In public international law, the overarching concept of sustainable development vitiates fragmentation. It inspires cooperation, coherence and innovative governance systems.

What is Sustainable Development Law

Abstract. This book analyses recent developments in international sustainable development law (ISDL), a field emerging at the intersection between international economic, environmental, and social law.

Hundreds of new bi-lateral, regional, and global treaties have been negotiated in the areas of trade, environment, and development over the past two decades, yet most of them face profound problems in implementation.

Sustainable Development Law: Principles, Practices, and ...

In the last several years, the field of Sustainable Development Law has shifted, to an integration of international economic, social, and environmental law with the goal of reducing poverty in developing nations. Still, one of the major issues in this area is whether "sustainable development" is law, soft law, or policy.

Sustainable Development Law (SDL) Research Guide - GlobalLex

For some, the answer to the question of its relationship to the law is straightforward: sustainable development does not belong to law; it may be an important philosophical or political objective, but it is not a legal one. 3 Its connection with the law is restricted to the fact that it may contribute to law formation. As a political objective, it will exert an impact on international negotiations, and as such may influence the content of the law while remaining separate from it.

Sustainable Development in International Law: Nature and ...

Published under the auspices of the Max Planck Foundation for International Peace and the Rule of Law under the direction of Rüdiger Wolfrum. 1 In its famous report Our Common Future of 1987, the World Commission on Environment and Development, the so-called Brundtland Commission, understood 'sustainable development' ('SD') as 'development that meets the needs of the present without compromising the ability of future generations to meet their own needs' (ibid 43).

Oxford Public International Law: Sustainable Development

This paper examines the concept of sustainable development specifically from the perspective of international law. It investigates three main aspects: (1) the conceptual history of sustainable development; (2) the legal meaning attached to this concept; and, on the basis of these two aspects, also. (3) the nature, functions and practical operation of sustainable development in international legal practice.

Sustainable Development in International Law by Jorge E ...

Sustainable Development Law & Policy journal is a student-run initiative at American University Washington College of Law that focuses on reconciling the tensions between environmental sustainability, economic development, and human welfare. The SDLP journal embraces an interdisciplinary approach to provide a fuller view of current legal, political, and social developments.

international investment law and sustainable development. The 10 cases were selected based on their relevance for a range of issues relating to sustainable development, including environmental protection, socio-environmental impact assessment, renewable energy, taxation, corruption and human rights. The cases also highlight

International Investment Law and Sustainable Development

Sustainable development has since long been at the heart of the European project and the EU Treaties give recognition to its economic, social and environmental dimensions that should be tackled together. Development must meet the needs of the present without compromising the ability of future generations to meet their own needs.
