Teenage Wasteland provides memorable portraits of "rock and roll kids" and shrewd analyses of their interests in heavy metal music and Satanism. "A powerful book."-Samuel G. Freedman, New York Times Book Review "[Gaines] sheds light on a poorly understood world and raises compelling questions about what society might do to help this alienated group of young people."-Ann Grimes, Washington Post Book World "There is no comparable study of teenage suburban culture . . . and very few ethnographic inquiries written with anything like Gaines's native gusto or her luminous eye for detail."-Andrew Ross, Transition "An outstanding case study. . . . Gaines shows how teens engage in cultural production and how such social agency is affected by economic transformations and institutional interventions."-Richard Lachman, Contemporary Sociology "The best book on contemporary youth culture."-Rolling Stone

"This book offers practical guidance for understanding and implementing the American Psychological Association's Journal Article Reporting Standards for Quantitative Research (JARS-Quant) and Meta-Analysis Reporting Standards (MARS). These standards lay out the essential pieces information researchers need to report, including detailed accounts of the methods they followed, data results and analysis, interpretations of their findings, and implications for future research. The book reflects updates to the original JARS and the MARS that meet researchers' developing needs in the behavioral, social, educational, and medical sciences. It analyzes examples from APA journals, offering readers easy-to-read advice for implementing these revised standards in their own writing while also conforming with the APA Style guidelines laid out in the sixth edition of the Publication Manual. New and expanded chapters offer more detailed guidelines for reporting statistical analyses and unique elements of different types of research, including replication studies, clinical trials, and observational studies. This book is essential reading for experienced and early career researchers alike, as well as undergraduate and graduate students in research methods classes. It presents what JARS recommends for information to include in all reports on new quantitative data collections, and addresses the material that appears first in a research manuscript. It also describes the Method section, presents the JARS standards for reporting basic research designs and covers the general reporting requirements for the statistical results of studies with multiple participants in each condition."--Preface.
