## Technology Transfer - Pharmaceutical Guidance

Technology Transfer Process:  
The drug quality is designed based on basic data concerning efficacy and safety obtained from various studies in preclinical phases and data concerning efficacy, safety and stability of drug products obtained from clinical studies. The quality of design will be almost completed in Phase II clinical study.

## PHARMACEUTICAL TECHNOLOGY TRANSFER: AN OVERVIEW ...

# Access Free Technology Transfer And

Often, the technology required for local manufacturing is sourced from established technology providers. These already have ongoing programs for developing and updating products. Therefore, ensuring successful technology transfer from these partners is crucial in order to to quickly establish local pharmaceutical manufacturing.

lifecycle. The technology transfer must take place between development and commercialization.

## Effective Pharmaceutical Technology Transfer - BII World

Technology transfer has various connotations in academia, law and business. In the pharmaceutical industry, the concept applies to the transfer of process technology from the R&D stage to a Contract Manufacturing Organization (CMO) for either clinical or full scale production of the Active Pharmaceutical Ingredient (API) or New Chemical Entity (NCE).
