A tense and nerve-shattering classic from the highly acclaimed master of action and suspense. A ROLLING FOR KNOX is how the journalists describe the Presidential motorcade as it enters San Francisco across the Golden Gate. Even the ever-watchful FBI believe it is impregnable as it has to be with the President and two Arab potentates aboard. But halfway across the bridge the unthinkable happens. Before the eyes of the world a master criminal pulls off the most spectacular kidnapping in modern times "

The Gate is an absorbing panoramic account of the building of one of the world's most beautiful and famous landmarks. In a narrative richly laden with detail and the flavor of the period, John van der Zee reveals for the first time the complete history of the longest single-span suspension bridge of its time—including the identity of the man who actually designed it, which has been obscured since its completion in 1937. With novelistic flair, van der Zee recounts an exciting drama of human greed, ambition, frailty, courage, and intellectual achievement. "It is among the top books on California I have ever read."-Kevin Starr, State Librarian of California and author of Americans and the California Dream "A case study of personal and technological adventure bordering on hubris...The engineers in this bok come alive as people, with all the faults and foibles associated iwth the human species. A fascinating work that shows that the best of cutting-edge engineering is much, much more than science and technology."-Henri Petroski, Nature

A spine-chilling saga of virulent racism, human folly, and the ultimate triumph of scientific progress. For Chinese immigrant Wong Chut King, surviving in San Francisco meant a life in the shadows. His passing on March 6, 1900, would have been unremarkable if a city health officer hadn't noticed a swollen black lymph node on his groin—a sign of bubonic plague. Empowered by racist pseudoscience, officials rushed to quarantine Chinatown while doctors examined Wong's tissue for telltale bacteria. If the devastating disease was not contained, San Francisco would become the American epicenter of an outbreak that had already claimed ten million lives worldwide. To local press, railroad barons, and elected officials, such a possibility was inconceivable—or inconvenient. As they mounted a cover-up to obscure the threat, ending the career of one of the most brilliant scientists in the nation in the process, it fell to federal health officer Rupert Blue to save a city that refused to be rescued. Spearheading a relentless crusade for sanitation, Blue and his men patrolled the squalid streets of fast-growing San Francisco, examined gory black buboes, and dissected diseased rats that put the fate of the entire country at risk. In the tradition of Erik Larson and Steven Johnson, Randall spins a spellbinding account of Blue's race to understand the disease and contain its spread—the only hope of saving San Francisco, and the nation, from a gruesome fate.
