The Mayan Calendar consists of three separate corresponding calendars: the Long Count, the Tzolkin (divine calendar), and the Haab (civil calendar). Each of them is cyclical, meaning that a certain number of days must occur before a new cycle can begin. The three calendars are used simultaneously.

The Mayan Calendar - Time and Date

The Maya calendar is a system of calendars used in pre-Columbian Mesoamerica and in many modern communities in the Guatemalan highlands, Veracruz, Oaxaca and Chiapas, Mexico. The essentials of the Maya calendar are based upon a system which had been in common use throughout the region, dating back to at least the 5th century BCE. It shares many aspects with calendars employed by other earlier Mesoamerican civilizations, such as the Zapotec and Olmec and contemporary or later ones such as the Mix

Maya calendar - Wikipedia

Mayan calendar, dating system of the ancient Mayan civilization and the basis for all other calendars used by Mesoamerican civilizations. The calendar was based on a ritual cycle of 260 named days and a year of 365 days. Taken together, they form a longer cycle of 18,980 days, or 52 years of 365 days, called a " Calendar Round."

Mayan calendar | chronology | Britannica

The Mayan calendar was highly complex and it was also used by other Mesoamerican people. The Maya followed a 52-year Calendar Round. This resulted from two calendar cycles, the Haab and the Tzolkin, which acted at the same time but were independent of each other. The two cycles reached the same point after a period of 52 years.

Mayan Calendar Facts | Mayan Calendar For Kids | DK Find Out

The most commonly known Mayan cyclic calendars are Haab and Tzolkin. In addition to these, the Maya also developed the Long Count calendar to chronologically date mythical and historical events. The 13 baktun cycle of the Mayan long-account calendar is 1,872,000 days or 5,125.366 years long.

What has the Mayan calendar predicted about the end of the ...

The Mayan calendar, which spanned for about 5,125 years starting in 3114BC, reached its end on December 21, 2012. The date was hailed by conspiracy theorists as being 'the end of the world',...

End of the World: Mayan calendar 'was wrong and world will ...

What we call the Mayan calendar is actually a set of three interlocking calendars, the sacred calendar of 260 days called the Tzolkin, the solar calendar of 365 days known as the Haab, and a Long Count calendar of much longer time periods.

The Mayan Calendar - History

The 260-day calendar, also known as the Sacred Calendar or Tzolk'in in Maya, has 20 day associated with the numbers 1-13 (20 x 13 = 260). It would run as follow: 1 Imix, 2 Ik, 3 Akbal, 4 Kan... to 13 Ben, then numeral 1 would return and get associated with the fourteenth day: 1 Ix, then 2 Men, 3 Kib and so on continuing in an endless cycle.

Mayan calendar warning: Researcher claims 'serious ...

The Maya sacred calendar is called Tzolk'in in Yucatec Mayan and Chol Q'ij in K'iche' Mayan. This calendar is not divided into months. Instead, it is made from a succession of 20 day glyphs in combination with the numbers 1 to 13, and produces 260 unique days. Multiplying 20 x 13 equals 260 days.

The Calendar System | Living Maya Time

The Haab calendar is one Maya method of counting time. It is roughly based on the solar cycle, and so it is relatively recognizable to users of the Gregorian calendar. "Haab" itself translates as "year." Each haab has 18 months (uinals) of 20 days.

How to Read the Maya Calendar: 11 Steps (with Pictures ...

The Maya calendar uses three different dating systems in parallel, the Long Count, the Tzolkin (divine calendar), and the Haab (civil calendar). Of these, only the Haab has a direct relationship to the length of the year. A typical Mayan date looks like this: 12.18.16.2.6, 3 Cimi 4 Zotz. 12.18.16.2.6 is the Long Count date.

The Mayan Calendar | Calendars

The Maya calendar system records a series of recurring cycles of time based on the movements of the Sun, Moon, and planets. Any given date repeats at cyclic intervals, just as, for example, January 1st in the Gregorian calendar repeats every time the Earth completes a revolution around the Sun. A complete Maya Long Count cycle is 5,125 years long.

Maya Calendar Converter | Living Maya Time

The Mayan Calendar system included five cycles similar to the Gregorian Calendar because it counts days, months, years, centuries, and even millennia. The key difference, as explained by The Smithsonian, "is in the name and magnitude of the various cycles. Like Maya mathematics, the Long Count Calendar system counts by 20s."

The Mayan Calendar 101 - Calendar

The most recent prediction by conspiracy theorists thought the world would come to an end on June 21 this year, with reference to the Mayan calendar. Begley, from Indiana, now believes the world...

'World will end THIS YEAR just days before Christmas ...

The Mesoamerican Long Count calendar is a non-repeating, vigesimal (base 20) and octodecimal (base 18) calendar used by several pre-Columbian Mesoamerican cultures, most notably the Maya. For this reason, it is often known as the Maya (or Mayan) Long Count calendar.

Mesoamerican Long Count calendar - Wikipedia

You might recall that the world was supposed to end back in 2012, according to some interpretations of the "end" of the Mayan calendar. Now a new interpretation is circulating that essentially says...

A much-needed guide to the Mayan calendar systems and the essentials of calendar development throughout the world.

Reveals the Mayan calendar to be a spiritual device that describes the evolution of human consciousness from ancient times into the future • Shows the connection between cosmic evolution and actual human history • Provides a new science of time that explains why time not only seems to be speeding up in the modern world but is actually getting faster • Explains how the end of the Mayan calendar is not the end of the world, but a path toward enlightenment The prophetic Mayan calendar is not keyed to the movement of planetary bodies. Instead, it functions as a metaphysical map of the evolution of consciousness and records how spiritual time flows--providing a new science of time. The calendar is associated with nine creation cycles, which represent nine levels of consciousness or Underworlds on the Mayan cosmic pyramid. Through empirical research Calleman shows how this pyramidal structure of the development of consciousness can explain things as disparate as the common origin of world religions and the modern complaint that time seems to be moving faster. Time, in fact, is speeding up as we transition from the materialist Planetary Underworld of time that governs us today to a new and higher frequency of consciousness--the Galactic Underworld--in preparation for the final Universal level of conscious enlightenment. Calleman reveals how the Mayan calendar is a spiritual device that enables a greater understanding of the nature of conscious evolution throughout human history and the concrete steps we can take to align ourselves with this growth toward enlightenment.

Dispels the prejudices and misconceptions that surround the Mayan Calendar, 2012, and the existence of extraterrestrial life.

Perform this script about an ancient Maya love story.

"Mayan Calendar Astrology: Mapping Your Inner Cosmos" is the quintessential handbook to help you understand the art of Mayan astrology and how to harness it for a profound illumination of your personal lifepath. If you liked "Jaguar Wisdom," this book will take you even deeper into the powerful insights that Mayan astrology can offer, whether you're a seasoned expert or just a beginner. Included in the book are: - Complete information about the day signs and numbers - The importance of the Year Lord - The Mayan Destiny chart (also known as the Mayan Cross) - The complete nine-sign horoscope - Solar and lunar cycles - A unique method for determining the phases of human life - The personal compatibility matrices embedded within the Tzolk'in - A little-known technique for assessing human relationships by combining two horoscopes into a composite chart - Calendar diagrams and horoscope templates - A powerful and meditative technique called the "Path of Feathered Serpent," based on our own "personal lunar month" and designed, through a series of guided meditations, to awaken the koyopa or inner lightning we all possess. REVIEWS: "I am profoundly grateful to Kenneth Johnson for sharing his experientially based understanding of the Tzolk'in in this remarkable book. As a long-time lover of the Mayan world, 'Mayan Calendar Astrology' finally opened my eyes to the subtle workings of the 260-day calendar and led me to embrace it as a genuine path to self-understanding. The author's work is based upon his years of work with several aj q'ijab' in the Guatemalan highlands, primarily in Momostenango, the important center for contemporary Mayan calendar knowledge. Johnson's explanations of the significance of the 13 numbers, the Mayan Destiny chart, the Year Lords, and the Path of Feathered Serpent are unique in popular literature and will enrich the understanding of even dedicated scholars." - Robert Sitler, PhD, Director, Latin American Studies, Stetson University

Mayan daykeeper Hunbatz Men reveals the multi-calendar system of the Maya that guided the lives of his ancestors and how it can guide us today • The first book to reveal the secrets of the Mayan Pleiades calendar: the Tzek'eb • Explains how the Maya used their astronomical knowledge to guide their lives on Earth The Mayan Calendar has taken on special prominence with the imminent arrival of 2012, a date that many claim is the end of that calendar. However, as Mayan elder and daykeeper Hunbatz Men shows, the cosmological understanding of his ancestors was so sophisticated that they had not one, but many calendars, each based on the cycles of different systems in the cosmos. In this book he reveals for the first time the Tzek'eb, or Pleiades, Calendar of 26,000 years, which charts the revolution of our solar system around Alcyone, the central star of the Pleiades system. He also discusses the K'uuk'ulcan Calendar of the 4 seasons of the solar year and the wheel of the K'altunes Calendar, which is composed of 13 cycles of 20 years each that form a calendar of 260 years. In traditional Mayan culture the computation of time was not determined by simple economic or social motives. The calendars served the higher purpose of synchronizing the lives of human beings and their societies to the great cosmic pulsation, to the rhythm of the annual seasons, and to the other cycles that dictate changes upon Earth. Mayan understanding of the cosmic cycles was so exact that this knowledge could be used to influence all stages of life--from planning when to conceive (parents could choose not only the sex of their child but its vocation and future destiny) to plotting out the course of the entire society. Pyramids played a crucial role in applying this wisdom because, as Hunbatz Men shows, they were able to produce and transform energy in accordance with the cosmic cycles charted by the calendars. This book reveals for the first time the wisdom of the multi-calendar Mayan system and how it can help guide our modern world.

Take a look at the science behind the Mayan calendar, prophecies and mythology. The Maya believed multiple cycles governed civilization. They created various calendars to track these cycles. Their short count calendar tracked a 256-year cycle believed to control epidemics, famines, warfare and more. Scientists have found a 250-year solar cycle that also appears to affect epidemics, famines, warfare and more. Their long count calendar tracked a 5000-year cycle related to natural disasters and cosmic catastrophes. Scientists have also discovered that the Earth is subjected to periodic bombardment by comets and asteroids that plunges the world into long periods of darkness and cold. Mayan mythology appears to record such events and in some instances even the exact dates on which these catastrophes occurred in the past. By comparing these dates with ice core records, sedimentary records, and climate records, this book reveals the truth about civilization's darkest days. And what may lie ahead in the future.

In Maya Political Science: Time, Astronomy, and the Cosmos, Prudence M. Rice proposed a new model of Maya political organization in which geopolitical seats of power rotated according to a 256-year calendar cycle known as the May. This fundamental connection between timekeeping and Maya political organization sparked Rice's interest in the origins of the two major calendars used by the ancient lowland Maya, one 260 days long, and the other having 365 days. In Maya Calendar Origins, she presents a provocative new thesis about the origins and development of the calendrical system. Integrating data from anthropology, archaeology, art history, astronomy, ethnohistory, myth, and linguistics, Rice argues that the Maya calendars developed about a millennium earlier than commonly thought, around 1200 BC, as an outgrowth of observations of the natural phenomena that scheduled the movements of late Archaic hunter-gatherer-collectors throughout what became Mesoamerica. She asserts that an understanding of the cycles of weather and celestial movements became the basis of power for early rulers, who could thereby claim "control" over supernatural cosmic forces. Rice shows how time became materialized--transformed into status objects such as monuments that encoded calendrical or temporal concerns--as well as politicized, becoming the foundation for societal order, political legitimization, and wealth. Rice's research also sheds new light on the origins of the Popol Vuh, which, Rice believes, encodes the history of the development of the Mesoamerican calendars. She also explores the connections between the Maya and early Olmec and Izapan cultures in the Isthmian region, who shared with the Maya the cosmivision and ideology incorporated into the calendrical systems.

Read Online The Mayan Calendar And The Transformation Of Consciousness

Does the end of the Mayan Calendar start the countdown to Judgment Day? Biblical and historical researcher David Montaigne concludes that this is the case. He says that the end of the Mayan Long Count is the official start of the Bible's seven-year tribulation-both were focused on the same astronomical events that occur from 2012 to 2019. The world as we know it will be gone by 2020. Texts from ancient India tell us about great cycles of destruction. The Egyptians told the same basic story with different names. The Maya reveal another version of the story, and were very clear about the timing of events from December 2012 to 2019. Your average American is no expert on these cultures, but most people do have a Bible at home-and the clearest details on what is about to happen can be found in the Bible, if you don't let someone else tell you which parts you should focus on. No, this isn't what you were taught in Sunday school. Religious leaders guide us between the raindrops of curious comments in the Bible. We are discouraged from focusing on the parts they say we weren't meant to understand. But if we stop glossing over these important passages we will understand a flood of details about the End Times. Our "leaders" are not ignorant of these events. The elite already know what is about to happen and they have made preparations most rational people would not believe, because evidence is suppressed to avoid chaos. They want us to remain ignorant, or at least to believe that the details are secrets that cannot be known. But the coming events (and their timing) are not secrets. Years ago, this book's publication would not have been tolerated by those in power. But by now it doesn't matter much-their plans are not going to be interfered with at this point. Your plans, however, can still be formulated, if you make the choice to understand. Topics include: Bible Prophecy; Matthew 24:36- Knowing the hour and the day; The Mayan Calendar and Mythology; Pole Shifts; Galactic Superwaves; Ancient Egypt; Ancient India; World Mythology; The Georgia Guidestones; The real Star of Bethlehem and the exact birthday of Christ; Calculating the Second Coming, and Judgment Day; more.

On the Mayan Calendar, every day of the year represents the energy of one of the twenty solar glyphs and one of the thirteen numbers, called tones. The solar glyph indicates your soul purpose, and the tone is the energy you will use to attain this purpose.
