By rights, Ozzy Osbourne should not be alive. He spent 40 years on a hell-raising, bat-biting, ant-snorting*, drink and drug-fuelled bender. He broke his neck going two miles an hour on a quad bike and died twice in a chemically induced coma. And yet - at 62 years old - he is healthier and happier than ever.

Wondering if science could explain how he survived his 40-year avalanche of drugs and alcohol, Ozzy Osbourne became one of a handful of people in the world to have his entire DNA mapped in 2010. It was a highly complex, \$65,000 process, but the results were conclusive: Ozzy is a genetic anomaly. The "Full Ozzy Genome" contained variants that scientists had never before encountered and the findings were presented at the prestigious TEDMED Conference in San Diego-making headlines around the world. The procedure was in part sponsored by The Sunday Times of London, which had already caused an international fururoe by appointing Ozzy Osbourne its star health advice columnist. The newspaper argued that Ozzy's multiple near-death experiences, 40-year history of drug abuse, and extreme hypocondria qualified him more than any other for the job. The column was an overnight hit, being quickly picked up by Rolling Stone to give it a global audience of millions. In TRUST ME, I M DR. Let's face it: your GP has never swallowed a bumble bee at 70mph; been declared clinically dead (twice); presided over The Most Dysfunctional Family in Western Civilisation; endured weeks of rabies injections (thanks to a misunderstanding with a bat); received a mistaken diagnosis of Parkinson's Disease; broken his neck in a quad bike accident; survived a (near) direct hit by a plane; or personally tested every drug known to modern science. Ozzy Osbourne has. So why not join the growing ranks of patients who come to the Prince of Darkness for advice on everything from the pitfalls of sleeping with your mothers' younger boyfriend, to men who burst inexplicably into tears during urination? Actually . . . there are lots of very good reasons not to do this. Please don't let them stop you. Based on his runaway hit columns in the Sunday Times and Rolling Stone, Trust Me, I m Dr Ozzy is outrageously hilarious, oddly informative, and the most entertaining consultation you'll ever have.

"They've said some crazy things about me over the years. I mean, okay: 'He bit the head off a bat.' Yes. 'He bit the head off a dove.' Yes. But then you hear things like, 'Ozzy went to the show last night, but he wouldn't perform until he'd killed fifteen puppies . . .' Now me, kill fifteen puppies? I love puppies. I've got eighteen of the f**king things at home. I've killed a few cows in my time, mind you. And the chickens. I shot the chickens in my house that night. It haunts me, all this crazy stuff. Every day of my life has been an event. I took lethal combinations of booze and drugs for thirty f**king years. I survived a direct hit by a plane, suicidal overdoses, STDs. I've been accused of attempted murder. Then I almost died while riding over a bump on a quad bike at f**king two miles per hour. People ask me how come I'm still alive, and I don't know what to say. When I was growing up, if you'd have put me up against a wall with the other kids from my street and asked me which one of us was gonna make it to the age of sixty, which one of us would end up with five kids and four grandkids and houses in Buckinghamshire and Beverly Hills, I wouldn't have put money on me, no f**king way. But here I am: ready to tell my story, in my own words, for the first time. A lot of it ain't gonna be pretty. I've done some bad things in my time. I've always been drawn to the dark side, me. But I ain't the devil. I m just John Osbourne: a working-class kid from Aston, who quit his job in the factory and went looking for a good time."

In the fall of 2005, Frank Turner was virtually unheard of. His rock band, Millions Dead, was finishing up a grueling tour and had agreed that their show on September 23 would be their last. The entry on the band's schedule for September 24 read simply: "Get a job."Cut to July 2012—the London Olympics, where Turner and his backing band, The Sleeping Souls, are playing the pre-show, after having headlined sold-out arena shows across the UK for months. Å The Road Beneath My Feet is the unvarnished story of how Turner went from crashing on couches at house shows to performing for thousands of screaming fans Å who roar his every lyric back at him. Å Told through tour reminiscences, this is a blisteringly honest tale of a rock career that's taken Turner from drug-fuelled house parties and the grimy club scene to international prominence and acclaim. But more than that, it is an intimate account of what it's like to spend your life constantly on the road, sleeping on floors, invariably jetlagged, all for the love of playing live music.

The name 'Tony Iommi' sends shivers down the spines of guitarists around the world. As lead guitarist and songwriter of Black Sabbath, Tony Iommi is considered to be one of the most influential musicians of the past four decades and the inventor of heavy metal. From working class, Midlands roots, his unique playing style - a result of a disfiguring hand injury he suffered working in a sheet metal factory - created a dark and gothic sound unlike anything that had been heard before and which captured the mood of its time. Sabbath went on to become a superband, playing to massive audiences around the world and selling millions of records, and Iommi led the life of a rockstar to the fullest - with the scars from all the drug-fuelled nights of excess and wildness to show for it. Iron Manis the exclusive account of the life and adventures of one of rock's greatest heroes.

Garfield lives his life to the fullest . . . 9 times! Cave Cat -- the first cat crawled out of the sea 10 million years ago. He was happy to be out of the water -- until he met Big Bob! The Vikings -- he was big, he was mean, he was a Viking. Garfield the Orange had looted a lot of cities, but none like St. Paul, Minnesota. Babes and Bullets -- Sam Spayed wasn't the best private investigator in the world, but he did have one terrific thing going for him -- a secretary who made a great cup of coffee. The Exterminators -- no mouse was safe from the exterminators. Catching mice was their life. It wasn't a pretty job -- especially the way they did it. Lab Animal -- specimen 19-GB was not happy at the prospect of being dissected, so he did something about it. What happened set the federal government on its ear. The Garden -- life was a carefree romp among hovering harmonicas for Cloey and the orange kitten . . . until they confronted the crystal box. Primal Self -- he was an ordinary house cat leading an ordinary existence. A shadowy memory from another time changed all that. Garfield -- the marvelous cat we all know and love. This is his life in a nutshell. Space Cat -- he was lost in space with a computer built by the lowest bidder. And, he was not about to let his life slip away that easily.
