How did United States-Iraq relations deteriorate into a double-feature war that destroyed Iraq's Ba'th regime, a secular sovereign government, and dragged the United States into an unforeseen chaos that has limited its willingness and ability to take part in other world affairs? The facts are well known, but until now there has been no serious academic study of the fundamental mutual misunderstandings between Iraq and the United States. Here Binah examines the perceptions, preconceptions and misunderstandings of both sides over a period of twelve years, from 1967 (the Six Day War) to 1979 (the emergence of the Khomeini Islamic Republic in Iran). This history provides the background to the fatal 1990 deaf-dialogue between Iraqi President Saddam Hussein and American ambassador April Glaspie, which led to the first Gulf war. The book deals with three main issues which

are the Persian (or Arabian) Gulf, the Kurdish rebellion and the Arab-Israeli conflict—including the increasing political involvement of the American Jewish community in matters relating to Israel and Jews in the Arab lands, as the influence of their organizations grew. While examining these issues, Binah bears in mind the over-arching concerns at that time of the Cold War and the international oil market. This thorough study provides a detailed and exact report of 'what happened' alongside the broader discussion of 'why did it happen', giving the reader the framework for such an examination. Regardless of its outcome, the Iraq War has had a transformative effect on the Middle East. To equip U.S. policymakers to better manage the war's long-term consequences, the authors analyzed its effects on the regional balance of power, local perceptions of U.S. credibility, the domestic stability of neighboring states, and trends in terrorism after conducting extensive interviews in the region and drawing from an array of local media sources.

The authors describe possible regional security structures and bilateral U.S. relationships with Iraq and Afghanistan. They recommend

that the United States offer a wide range of security cooperation activities to compatible future governments in Kabul and Baghdad but should also plan to hedge against less-favorable contingencies. They emphasize that the U.S. Air Force should expect to remain heavily tasked for the foreseeable future.

Iraq is a nation in crisis bordering on civil war. The country now faces growing violence, a steady rise in Sunni Islamist extremism, an increasingly authoritarian leader that favors Iraq's Sunnis, and growing ethnic tension between Arabs and Kurds. The recent Iraqi election offers little promise that it can correct the corruption, the weaknesses in its security forces, and the critical failures in governance, economic development, and leadership. The problems Iraq faces in 2014 are a legacy of mistakes made during and after the U.S.-led invasion in 2003, but increasingly the nation is dealing with the self-inflicted wounds of its leaders who abuse human rights, repress opposing factions, and misuse the Iraqi police and security forces to their own end.

Ending the U.S. war in Iraq required redeploying 100,000 military and civilian personnel; handing off responsibility for 431 activities to the Iraqi government, U.S. embassy, USCENTCOM, or other U.S. government entities; and moving or transferring ownership of over a million pieces of property in accordance with U.S. and Iraqi laws, national policy, and DoD requirements. This book examines the planning and execution of this transition.

Each issue covers separate country.
