memoir of a young French teenage girl's relationship with a famous, much older male writer—a universal #MeToo story of power, manipulation, trauma, recovery, and resiliency that exposes the hypocrisy of a culture that has allowed the sexual abuse of minors to occur unchecked. Sometimes, all it takes is a single voice to shatter the silence of complicity. Thirty years ago, Vanessa Springora was the teenage muse of one of the country's most celebrated writers, a footnote in the narrative of a very influential man in the French literary world. At the end of 2019, as women around the world began to speak out, Vanessa, now in her forties and the director of one of France's leading publishing houses, decided to reclaim her own story, offering her perspective of those events sharply known. Consent is the story of one precocious young girl's stolen adolescence. Devastating in its honesty, Vanessa's

painstakingly memoir lays bare the cultural attitudes and circumstances that made it possible for a thirteen-year-old girl to become involved with a fifty-year-old man who happened to be a notable writer. As she recalls the events of her childhood and her seduction by one of her country's most notable writers, Vanessa reflects on the ways in which this disturbing relationship changed and affected her as she grew older. Drawing parallels between children's fairy tales and French history and her personal life, Vanessa offers an intimate and absorbing look at the meaning of love and consent and the toll of trauma and the power of healing in women's lives. Ultimately, she offers a forceful indictment of a chauvinistic literary world that has for too long accepted and helped perpetuate gender inequality and the exploitation and sexual abuse of children. Translated from the French by Natasha Lehrer

Independent (U.K.) • Times (U.K.) • Publishers Weekly • Library Journal • Kirkus Reviews • Booklist • Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years

after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in

feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

Clinical Ethics introduces the four-topics method of approaching ethical problems (i.e., medical indications, patient preferences, quality of life, and contextual features). Each of the four chapters represents one of the topics. In each chapter, the authors discuss cases and provide comments and recommendations. The four-topics method is an organizational process by which clinicians can begin

to understand the complexities involved in ethical cases and can proceed to find a solution for each case.

To preserve public vaccine policy, Dr. Paul Thomas was disbarred and discredited—discover how he was punished for pursuing the truth for his patients. On December 3, 2020, the Oregon Medical Board issued an emergency order to suspend the license of renowned physician Paul Thomas, MD. The ostensible reason was that Dr. Thomas posed a threat to public health by failing to vaccinate his pediatric patients according to the CDC's schedule. However, the order came just days after Thomas published a peer-reviewed study indicating that his unvaccinated patients were the healthiest children in his practice. The medical board ignored this data despite having requested Thomas to produce peer-reviewed

evidence to support his alternative approach. “Dr. Paul” started out practicing medicine the way he was trained to, which meant vaccinating according to the CDC’s routine childhood vaccine schedule. But then he went on a journey of awakening, becoming what he calls “vaccine risk aware,” and arrived at a place where no longer in good conscience could he continue “business as usual” with this one-size-fits-all approach. He left a private group practice to open his own clinic with the foundational principles of individualized care and respect for the right to informed consent. He wrote the Vaccine-Friendly Plan with Jennifer Margulis, PhD, to help parents navigate the decision-making process. Then the accusations from the medical board started coming. The War on Informed Consent exposes how the medical board suspended Dr. Thomas’s license on false pretexts, illuminating how the true

reason for the order was that, by practicing informed consent, he posed a threat to public vaccine policy, which is itself the true threat to public health.
